Work

Full-stack Software Developer
Andela

11/2018 – Present   *Uganda*
Achievements/Tasks
- Boosted efficiencies in developing software using Agile. Worked remotely with distributed development team members to build software for Andela's clients.
- Designed web apps using Angular in the front-end and Nodejs in the back-end. Used GitHub, Slack, and Zoom for collaboration. Used TDD and circle CI or Travis CI and Docker for continuous integration and deployment.
- Wrote highly maintainable, SOLID code for products like Tembea, forming the core framework.

Full-stack and mobile Developer
Oktopus

10/2017 – 11/2018   *Uganda*
Achievements/Tasks
- Designed web apps using Angular in the front-end, Nodejs in the back-end, and mobile apps using android java.
- Used Firebase for storage, hosting, and cloud functions, AWS- EBS, Git, SendGrid for emails, MongoDB, and MYSQL for storage, Google Cloud Platform, and Tensorflow to predict the credit score.
- Collected customer requirements to develop specifications for creating well-organized project plans.

Mobile Developer
Fulusi

11/2016 – 11/2018   *Uganda*
*Achievements/Tasks*
- Built Wesgas a mobile application that helps users in Uganda to buy and pay for gas and accessories online. It currently has over 1000 downloads on Playstore.
- The success of the Wesgas app led to the development of the Pearl Energy App to included other companies like Shell.
- Used Android Java for building the apps, firebase database, and google maps API for location, adobe illustrator for designing mockups and icons.
