ANDELA

Software Developer
Andela

11/2018 – Present   *Uganda*

Achievements/Tasks

- Learned how to work in distributed teams. I worked on a product with teammates in different countries. We applied the use of continuous integration and Git.
- While at Andela, I used my Angular and node skills on Tembea product where I worked with Slack APIs. It was an Andela travel management platform.
- Was a Technical team lead for a team in Rwanda. Mentored the developers on how to work remotely. I helped them learn best coding principles like SOLID and how to follow conventions.

Software Developer
Oktopus

10/2017 – 11/2018   *Uganda*

Achievements/Tasks

- Built a Borrocracy web and mobile application that connects lenders to borrowers. It uses AI ie Tensorflow to predict the credit score of borrowers. ⌨
- Worked on Sekako which was a platform for comedians to stream and upload their comedy videos.
- I also built the Students Evaluation Protocol, which was a platform to connect students and teachers to parents. It provided exam results and indiscipline reports in real time using firebase in app notifications and Sendgrid emails.

Software Developer
Fulusi

11/2016 – 11/2018   *Uganda*

Achievements/Tasks

- Built wes gas a mobile application. It helps users in Uganda to buy and pay for gas and accessories from wesgas online. It currently has about 1000+ downloads on play store. ⌨
- Pearl Energy App was developed to include other companies like shell and payment for power. This was due to the success of Wesges.
- Designed mockups and prototypes for applications using adobe illustrator to help clients get a feel of the flow and look of their products.
